**Subject:** JFOS3 / CMP Work Plan  
**Attachments:** JFOS3\_CMP Work Plan\_20150902\_Text and Appc.pdf

Ravi,

On behalf of Jorgensen Forge and Boeing, SoundEarth is submitting the CMP Work Plan for the JFOS project. This submittal was prepared in response to EPA's August 28, 2015 comment letter, as further clarified in our meeting on August 31, 2015.

We have not been able to answer your question this afternoon pertaining to 40 C.F.R. §761.79 (h)(1) and will not have further opportunity to research that question until next week. Therefore, given the time constraints for initiating time-critical removal action the week of September 14, 2015, we have attached the July 14, 2015 decontamination submittal as Appendix D to the CMP Work Plan, and would like to know if Miles Dyer's August 18, 2015 e-mail answers your question?

We are otherwise on schedule to commence work in the unshored excavation area the week of September 14, 2015. Engineering design, construction plans and technical specifications for the shored excavation are in progress. As discussed on August 31, the timeline presented in Section 7.0 of the CMP Work Plan has been revised to accommodate EPA review of the construction plans and technical specifications, as well as preconstruction submittals that pertain to BMPs and wastewater management.

The CMP Work Plan can be downloaded from this link between now and September 16:

[JFOS3 CMP Work Plan 20150902 F.pdf](#)

We have had problems in the past with remote server links, so I am also transmitting the CMP Work Plan in two pieces; the text and appendices are attached, and I will e-mail the figures momentarily in a separate e-mail.

I will follow up with two hardcopies for EPA's records, which should arrive next week.

Regards,

Dee

Deborah Gardner
